

We at AQM pride at is ensuring that we bring increasing value to all our customers, given that commitment over 95% of our customers retain us for their testing needs

Some of the frameworks that we have created are extremely unique and increases productivity of the customers by up to 300%, while the others eliminate the need to have technical resources to automate their testing suite

Given below are some of the innovations at AQM

- **TESTBOTS**
- **BOT<sup>™</sup>**
- **SCRIPTLESS AUTOMATION FOR MOBILE**
- **SYNTHETIC MONITORING**

### *Testbots*

- Ready Analytics on Test Case execution
- Automated Assignment of Bugs to develops
- Automated Duplicate Test case identifier
- 300% improvement on productivity

### *BOT<sup>™</sup>*

- Facilitates testing multiple devices at one go
- Realtime detection of Defects
- Supports multiple Android & iOS versions
- Works across Native, Hybrid and Web Apps
- Reduces Cost & efforts on mobile testing

### *Scriptless Automation for Mobile*

- Automate your mobile testing
- “Generate Script once and Test Multiple times”
- Auto Script Generation
- Auto population of data for end-to-end automation

## *Synthetic Monitoring*

- Real time performance monitoring of Mobile Apps
- Allows FineTuning of performance in real time
- Completely Parametrizable ( Choose 1. Monitoring frequency, pages to be monitored etc.)
- Provision for auto-reporting of performance issues in realtime
